POULTRY

Section 13: Pennsylvania Poultry, Including Chickens, Turkeys, Waterfowl, Upland Game Birds, Ratites and Pigeons/doves, and Hatching Eggs

Requirements:

1. All Pennsylvania poultry, including chickens, turkeys, waterfowl, and upland game birds entering an exhibition must bear an official PDA-issued crimp style or butt end style leg band. Ratites must be identified with a neck band or an electronic implant device (the exhibitor must supply a reader). Pigeons and doves must bear a unique individual identification leg band but do not have to be identified with an official PDA leg band.
2. An Owner-endorsed Poultry Health Certificate or a Certificate of Veterinary Inspection (health chart or CVI) must accompany all Pennsylvania poultry, including chickens, turkeys, waterfowl, upland game birds, and ratites; and pigeons/doves; and hatching eggs. The certificate must include the following:
 - Name and location of exhibition; and
 - Name, address, and telephone number of the owner; and
 - A statement that the entries and the flock of origin are free of evidence of infectious and contagious diseases; and
 - Owner signature and date of that signature.
3. **Avian Influenza Testing and Verification:** All samples must be collected by a Certified Poultry Technician or a Category II Accredited Veterinarian-
 - All poultry, including chickens, turkeys, waterfowl, upland game birds, and ratites, (pigeons/doves excluded), and their hatching eggs for exhibition must originate from a flock in which a random, representative sample of a minimum of 30 birds, 3 weeks of age or older, were tested for avian influenza within the **30** days prior to opening date of the exhibition. The birds or hatching eggs must be accompanied by the most recent test report (copy acceptable). Test results must be negative. If there are fewer than 30 birds in the flock, test all birds. For waterfowl, cloacal swab samples must be collected for testing instead of blood samples, and the swabs may be tested using PCR techniques. Swabs from geese and ducks may not be combined in the same tube for testing. Untested birds shall not be comingled with or added to the tested flock after negative samples have been collected and before the show.
4. **Pullorum-typhoid Testing and Verification** (pigeons/doves and waterfowl excluded for exhibition). All samples must be collected by a Certified Poultry Technician or a Category II Accredited Veterinarian.
 - Poultry, including chickens, turkeys, upland game birds and ratites (waterfowl excluded) and their hatching eggs must originate from a flock in good standing on the NPIP Pullorum-typhoid Clean Program (and there was no break in the chain of ownership by NPIP participants) or from a flock in good standing on the PA Pullorum Equivalent Program. The birds or hatching eggs must be accompanied by the most recent test report (copy acceptable). Test results must be negative. If the rapid whole-blood plate agglutination test was done, the most recent NPIP 9-2 form or state equivalent form must accompany the birds or hatching eggs (copy acceptable). Test results must be negative. If birds are less than one year of age and originate from an NPIP Clean hatchery, they do not have to be tested for pullorum-typhoid if they are accompanied by an NPIP 9-3 form from that hatchery and any additions to the flock were also from NPIP Clean sources. The NPIP number must be noted on the report for NPIP Pullorum-typhoid Clean flocks;

DEPARTMENT 8

OR

- All individual birds (pigeons/doves and waterfowl excluded) for exhibition (maximum of 300) must have had a pullorum-typhoid test within the 90 days prior to the opening date of the exhibition. The birds must be accompanied by the most recent test report, or state equivalent form for the rapid test (copies acceptable). Test results must be negative. The following age restrictions apply:
 - Chickens shall be tested at 4 months of age or older.
 - Turkeys shall be tested at 12 weeks of age or older.
 - Game birds shall be tested at 4 months of age or older, or upon sexual maturity, whichever comes first.
 - Ratites shall be tested at 12 months of age or older.
 - All birds not meeting these age restrictions at the time of sampling are exempt from pullorum-typhoid testing requirements.

Section 14: Out of State Poultry, Including Chickens, Turkeys, Waterfowl, Upland Game Birds, Ratites, Pigeons/doves and Hatching Eggs

Requirements:

1. All poultry, including chickens, turkeys, waterfowl and upland game birds entering an exhibition must bear an official leg band issued by the state or country of origin.
2. Ratites must be identified with a neck band or an electronic implant device (the exhibitor must supply a reader). Pigeons and doves must bear a unique individual identification leg band but do not have to be identified with an official state leg band.
3. An Owner-endorsed Poultry Health Certificate or a Certificate of Veterinary Inspection (health chart or CVI) must accompany all poultry, including chickens, turkeys, waterfowl, upland game birds, and ratites; and pigeons/doves; and hatching eggs. The certificate must include the following:
 - Name and location of exhibition; and
 - Name, address, and telephone number of the owner; and
 - A statement that the entries and the flock of origin are free of evidence of infectious and contagious diseases; and
 - Owner signature and date of that signature.
4. **Avian Influenza Testing and Verification:** All samples must be collected by a Certified Poultry Technician or a Category II Accredited Veterinarian. All poultry, including chickens, turkeys, waterfowl, upland game birds, and ratites, (pigeons/doves excluded), and their hatching eggs must originate from a flock in which a random, representative sample of a minimum of 30 birds, 3 weeks of age or older, were tested for avian influenza within the **30** days prior to the opening date of the exhibition.
